

Introduction

This report presents an overview of CDR's activities during 2009. It contains discussion of significant achievements from 1992 to 2009, development during 2009 and the main projects in preparation.

Each sector includes three tables:

- The Sector Overview table lists projects that are complete or that are in progress. It includes the following information for each project:
 - The number and total value of contracts awarded up to 31 December 2009 (the value 0.0 indicates that the amount is less than US\$ 50,000);
 - The number and total value of completed contracts;
 - The number and total value of

contracts in progress and the percentage of completion for each project (averaged across the live contracts related to each project)

- The Contracts Awarded in 2009 table lists the contract awarded during the past year.
- The Contracts in Preparation table presents details of individual work packages or studies that are expected to be launched by CDR during the year 2010.

The report deals essentially with CDR work. For completeness of information, reference is made, where appropriate, to the activities of Ministries and other public bodies. The tables, however, include information relating to CDR activities only.
